

Problem-Solution Fit Canvas - Heart Disease Analysis

Date: 4/7/2026

Project Name: Heart Disease Analysis

Section	Content
Customer Segment(s)	Patients, Doctors, Hospitals, Diagnostic Centers
Problems/Pains	Late diagnosis, manual analysis, delayed treatment, high cost
Triggers	Chest pain, BP, cholesterol, ECG abnormalities, family history
Emotions	Before: fear/anxiety. After: relief/confidence
Available Solutions	Manual diagnosis, ECG, lab tests (accurate but time-consuming)
Customer Limitations	Limited access, cost, lack of awareness
Behavior	Irregular checkups; seek care after symptoms worsen
Channels	Online: apps, portals. Offline: hospitals, clinics
Root Cause	Poor lifestyle, smoking, diabetes, hypertension, obesity, stress
Your Solution	ML-based Heart Disease Analysis with Flask, MySQL, Tableau dashboards and reports
