

Solution Requirements - Heart Disease Analysis

Date: 4/7/2026

Project Name: Heart Disease Analysis

S.No	Category	Description	Priority
1	Authentication	Secure login for Doctor/Admin	High
2	Authorization	Admin manages system; Doctors analyze/view reports	High
3	External Interfaces	CSV/database and ML model	Medium
4	Transaction Processing	Store and analyze patient data	High
5	Reporting	Generate prediction reports	High
6	Business Rules	Prediction based on patient health parameters	High
7	Compliance	Protect patient privacy	Medium
8	Other	Update records and view history	Medium

Non-Functional Requirements

S.No	Category	Description	Target
1	Performance	Fast prediction	<3 sec
2	Scalability	Supports many records	5000+ records
3	Security	Encrypted data	Secure login
4	Reliability	High availability	99% uptime
5	Usability	Easy interface	User friendly
6	Other	Easy maintenance	Future updates
